

Instruction Sheet TABLESHUTTLE mod. TABS10.USA /MINI10.USA

To prepare the TABLESHUTTLE to accommodate your iPads or Tablets please follow these instructions.

1. Shorten the length of all the power supply adaptors to approximately 45 cm. / 18 ins. by bundling the loose cable towards the connector end as shown in the photo.

You may use cable ties to fix the cables to the desired length.

2. One by one plug all chargers into the power strip.

3. Thread the cords of the chargers through the opening between the adaptors area and the iPads area.

4. Line up each of the iPad connectors to their respective position.

5. Insert the tablets in their slots and connect all cables. Don't forget to turn on the red switch on the power strip once that has been connected to the power outlet.

6. Please note the main power cord can be pulled through the hole provided in the right side of the case to allow the recharging of tablets when the case is closed and secured. As with any electrical device, only use indoors, in a dry environment.
